

INCLEMENT WEATHER EMERGENCY SCHOOL CLOSINGS

The District Administrator or designee will determine whether or not to close school due to inclement weather, after appropriate consultation with others (i.e. transportation supervisor, law enforcement, etc.)

Once the decision has been made to close schools, the communications plan will be put into effect immediately and will include use of the district's messaging system and notification of area television and radio stations.

Should it be necessary to close school for additional days beyond the original closure, the decision will be made and communicated as early as possible.

The District Administrator will develop other necessary plans for the closing of schools and early dismissal to provide for orderly procedures. Inclement weather days will be made up as required by statutes, and by any Board of Education decision.
