

USE OF DISTRICT-OWNED VEHICLES

District-owned or leased vehicles will be driven only by properly licensed employees or volunteers of the District and Board of Education members. The District Administrator or their designee may grant permission for non-school employed adults to operate District-owned or leased vehicles that do not require a CDL.

Persons convicted of driving under the influence of drugs or alcohol or reckless driving within the previous three years may not be permitted to operate District-owned or leased vehicles. The District Administrator or their designee may conduct a periodic review of driver's licenses and records.

Under no circumstances will students be authorized to drive District-owned or leased vehicles on public streets and highways except students receiving behind-the-wheel driver training from a certified instructor employed by the District.
