

## STUDENT POLICIES GOALS

The central concern of Board of Education policies and Administrative Rules is the educational development of each child. The focus of the District shall be on the learner and their realization of personal and district goals.

Every student shall be given equal opportunity to reach their greatest potential, with full understanding that wide differences in capacities, interests and social/economic background must be addressed by the District. To accomplish this, the Board of Education will attempt to remove those barriers that stand in the way of any student who wishes to learn in the District's schools.
