

ADMINISTERING MEDICATIONS TO STUDENTS

The Rice Lake Area School District complies with state law governing the administration of drugs to students. The District maintains a procedural manual that provides definition as to what types of drugs will be administered, who will administer the drugs and under what restriction/conditions the drug will be administered, and keeps an updated file of the written instructions, permissions, and administration logs, as required by law. This policy also provides for the periodic review of those written procedures for the storage of non-prescription and prescription drugs, for record keeping and for the appropriate instruction of persons who may be authorized to administer non-prescription or prescription drugs to students.
